Save as my defaults Run Report

Please adjust the dates and times to find the patients you have assigned yourself to. However, note that only patients triaged during that time frame will be shown. Hence, if a patient is signed out to you, you should probably go at least 18 hours prior to the start time of your shift, but 24 hours is safer. In the above example, if I'm working the 10/7/2017 shift starting at 11pm, I would go back to at least 7am that day, if not 11pm the day before.

Pick "ED All Beds" in Location View, and then yourself as the FirstNet Provider.

Click "Run Report" and you will see a list of all the patients you have assigned yourself to on FirstNet.
